

## Remote learning – home/school agreement

The following points are necessary in order for remote learning to work successfully for pupils, parents/carers and school staff. This agreement is in addition to other school policies that remain in place throughout the duration of remote learning.

### School staff will:

- Give clear and easy to follow instructions explaining how to access remote learning tasks
- Provide a suitable range of appropriate learning opportunities for the duration of time that a pupil cannot be in school due to self-isolation
- Give regular feedback to pupils and parents to support pupils' learning and help them to make progress
- Where possible, make resources available to loan to pupils for them to while learning at home, including laptops or other equipment
- Focus on the learning pupils when teaching live lessons. This is not an appropriate time for conversations with parents.

### Parents and carers will:

- Read and follow the instructions given by staff to access remote learning
- Discuss the different learning tasks at home and encourage completion of all tasks that have been set
- Help to establish a routine that will promote good learning at home and prevent too much distraction
- Promptly raise any material concerns or issues with remote learning with the class teacher in an appropriate and professional way.
- Ensure that the school's resources, including laptops or other equipment that has been loaned, are being used safely and appropriately, and only for the purpose that they are intended, returning them in good condition at the end of remote learning (if required)
- Be respectful and appropriate where 'live lessons' are taking place remotely, including not participating in lessons unless requested (eg, to support younger pupils).
- Recognise that the class teacher is best placed to make choices about how lesson content is delivered, as would also be the case with lessons taught in the classroom.

### Pupils will:

- Follow the school rules
- Try your best in all parts of their remote learning
- Ask for help with learning from an adult at school if it is needed
- Use any school resources sensibly, including laptops or other equipment that has been loaned
- Talk to a parent, carer or an adult at school if anything is worrying you
